

WHAT DOG OWNERS AND VETS ARE SAYING ABOUT MYRISTIN®!

READ RESULTS ABOUT YOUNG AND OLD DOGS ALIKE.

I've been using Myristin in my veterinary practice since 1989 and have a great respect for this product. Typically, I've used it on my most intractable cases and found the success rate and improvement seen in just a short time to be very impressive. In a 'what works for the goose works for the gander' I began to use it routinely for hip problems and weakness in the rear end. It's worth the slightly higher price because my patients get dependable and powerful results. Now that they have a pet chewable I couldn't ask for anything more. The best part about it is the look of joy on my client's face when they come in for their re-exam and tell me that they have a new dog. It's so hard to see your pets in pain and it may have looked like a miracle to the owners but the simple truth of it is; this stuff works. Dr.

-Deva Khalsa, VMD. CVA, FBIH

MYRISTIN® is an important product in my tool box for healing dogs with joint problems.

-Dr. Anna Norman, DVM, Healing Touch Veterinary

Get MYRISTIN®. The Cetyl Myristoleate Oil (CMO) is of animal origin, not plant based and therefore is assimilated better, MUCH better, as our pets are carnivores. MYRISTIN® was created by the family of Harry Diehl, who discovered Cetyl Myristoleate in the first place. No one knows it better. CMO has 3 main functions. The first two are accomplished with most arthritis supplements: reducing inflammation and lubricating the joints. CMO also acts as an immune system modulator. The anecdotal evidence that we are hearing is a slowing of the progression of joint issues, and real potential as a prophylactic. Yes. I am prejudiced. My personal experience has been incredible. No progression in 4 years for my girl's Lumbosacral Stenosis. Other evidence that it works, at least in my book; we sell cases of it every month, our customers are reporting great results and the dogs are much more mobile. We have NEVER had a return. We are getting dogs off of prescription pain and joint meds and it is working better for them. Like anything else, do your research and make sure you know how it works, how to sell it, and use it yourself. You will use less, up to half, than other Cetyl Myristoleate brands.

-Lori Moreland, Pet Emporium Arvada, CO

Some of our rescue elephants at The Elephant Sanctuary came to us with bad hips from lying on concrete for many years. We put a few on MYRISTIN® and they are doing so much better. Thank you!

-The Elephant Sanctuary

Marley, now 11, has been on MYRISTIN® (and Cetyl M before MYRISTIN® was announced) for years. At 8 and 9, Marley won Westminster Breed for IRISH WATER SPANIELS. He has taken back to back BOBs at age 10! This is unheard of for any breed to beat all of the competition at age 10. I can't thank Katie's Bumpers enough for introducing us to MYRISTIN®. Every dog should be on it!

-Tim Ufkes, Breeder, Irish Water Spaniels.

I have had the MYRISTIN® for a couple days (maybe 3-4). Zeus, my 11 year old Newfie boy, seems to be walking more comfortably with it. This means that he is walking noticeably FASTER and LONGER on our walks. Even in the August weather.

-Brad Cole and CH Blue Heaven's Zeus of Mt. Bear

Dreyfuss, my 130lb 10 year old Newf, was really struggling with moving around, going on walks, climbing stairs, getting up and down. After we started MYRISTIN®, I could see the difference within a few weeks. He has been on it for over a year and he can go on long walks without being in pain afterwards, he can get up and down easily, he is comfortable and I can sleep without worrying about him every minute.

-Bobbie, school teacher, Long Island, NY

Prospector is counter surfing again at age 14, after just a few weeks on MYRISTIN®. Not what I expected, but I love seeing him so active. We thought he was a goner.

-Pam, Master Distributor for Plush Puppy USA

Emma, my 1.5 year old Cane Corso has such bad hip dysplasia; I thought she would have to be on pain meds forever. After a month on MYRISTIN®, she is running around like a puppy! I can't thank you enough.

-Emma's Mom, Mount Pleasant, PA

After a few months of being on MYRISTIN®, my 13 year old Vizsla jumped on the bed and had not done that in a year. We hunt with our Vizslas, he can now run and hunt for 90 minutes and when we are done, he is fine! He is tired, but he doesn't limp and isn't sore the next day. I am in love with MYRISTIN® and I know that it has improved our quality of life. Both of my vets have their dogs on MYRISTIN®. I'm going to start taking it so I can keep up with my dogs!

-Janet, Tucson AZ

My breeder recommended MYRISTIN® for my new Newfoundland puppy, Thor, to help regulate any issues that occur in the first 1.5 years. He loves the taste and eats them like a snack. He does beautifully in the ring and his movement is amazing.

-Pam, Atlanta GA

My dog can now go up and down the steps where he has not been able to in the past. Thank you for MYRISTIN®. You have brought us a better quality of life.

-Beverly Rouse

My 6 year old was injured during an agility trial. I spoke with Jill at Katie's Bumpers and thought I would try MYRISTIN®. I have and within a few weeks, her limp was gone and she is back in the ring like nothing happened! Thank you.
